

Meeting Notes

TDD Task Group

Monday, December 5, 2011

1:00 p.m. – 2:00 p.m. ET

Chair: *Dave De Block, ODL Inc.*

1. Call to Order , Review anti trust and meeting guidelines

- a. Participants: Dave DeBlock, Charlie Curcija, Howdy Goudy, Nealle Digert, Robert Hall, Roger LeBrun, Jeff Brain, Dennis Anderson (NFRC Staff), Brad Shultz, Jeff Brain, Willie DuPont, Gregg Vincent.

2. Appointed Recording Secretary - Gregg Vincent – Natural Light Energy Systems

3. Meeting Agenda reviewed and approved.

4. Unfinished Business

- a. Discuss most recent report on TDD VT Testing by LBNL dated 12/2/2011.

The changes to the previous version of the report were presented by Charlie Curcija. Additional data was presented by 30 and 60 degree using relative azimuth angles (RAZ), and it was concluded that the results were insensitive to the different RAZ. Much discussion was conducted on the summary table in the conclusion section of the report. The task group concluded that it would be beneficial to the industry having a single complex VT rating for the label, however have detailed product data available to architects and engineers to utilize special application software for site specific locations and studies. The task group, at this time, did not agree on how this data will be presented.

5. New Business

- a. Create NFRC 20x document mimicking NFRC202 translucent standard, TDD VT Testing by LBNL, and how the TDD TG can use these results to create a NFRC 20x VT standard for a NFRC VT rating.

The task group agreed to create a NFRC document for the Spring NFRC ballot. Two work groups were formed. Neall Digert, Gregg Vincent, and Dave De Block will work on the purpose and scope section in one group with Dave leading this group. Howdy Goudy and Charlie Curcija will work in the other group to develop terminology and methodology. Both groups will present recommendations to the larger TDD task group in early January.

6. Next Steps

- a. As soon as the above work groups develop proposed NFRC documents, Dave will schedule the next TDD Task Group conference call for review of the proposed NFRC20X document.

7. Adjourned – 1:57 p.m. ET
