Upon publication, this document can be used immediately.

## **Item 2: Certified Products Database (CPD) Modifications**

NFRC has deployed a series of maintenance items to the Certified Products Database (CPD) as follows:

- Manufacturer Login Changes:
  - A manufacturer’s company name can only be updated by NFRC staff. This eliminates the chances of an upload spreadsheet failing publication into the CPD. To request a company name change, please email [support@nfr.org](mailto:support@nfr.org).

- The comment box associated with manufacturer details has been removed for a manufacturer viewing their CPD login Home tab. If a manufacturer wishes to send correspondence to NFRC staff please use the email, [support@nfr.org](mailto:support@nfr.org), or a manufacturer may send correspondence to their respective Inspection Agency from the contact information listed here: [Inspection Agency Contact Information](#).
- Inspection Agency Login Changes:
  - All contents within the Product Line Comments can be deleted and saved without being required to leave a placeholder, individual character.
- Inspection Agency and Laboratory Changes:
  - When searching by manufacturer code, if the three letter combination is non-existent in the CPD, the search no longer results in an error screen directing the user back to the login page, but displays a user-friendly message “No matches found”.
- Product Line Details:
  - The tint code “LE” will no longer be incorrectly displayed over a “CL” code in the product line details page.
